

GROUND MOUNT SOLUTIONS

DCE offers the most topographically adaptable PV systems in the industry. With an unmatched terrain capability, DCE Ground Mount Solutions are designed for each customer's site, allowing up to a 20% grade.

- Diverse offerings for economic bidding and self-performing projects
- easy & efficient installs with minimal hardware, grounding, and quick-to-learn components
- Seismic, challenging topography, and multiple foundation options tackling
- System longevity with unparalleled connectivity and material quality for years of peak performance.

All GM solutions have multi-foundation options: DB (Driven Beam- I or CEE), GS (Ground Screw), B (Ballasted).

CARPORT SOLUTIONS

The DCE Carport Systems are designed by architects and engineers with more than 100 MW of carport design experience to deliver the best value performance and structural needs.

DCE Turn-Key Installation includes engineering, foundations, structural assembly, module, & complete electrical; DCE is your turn-key solution.

ROOF-TOP SOLUTIONS

DCE Solar's Eco-Top Rooftop Mounting Structures are industry-leading rooftop ballasted racking systems. All Eco-Top systems are designed to be the most roof-friendly systems on the market.

Foundations: Secure, Ballasted
